**Guide of FEICA to declare the composition of adhesives for food contact**

This practical guide published September 8, 2014 by FEICA (workgroup Paper & packaging) aims to help producers of adhesives in their choice of raw materials for the formulation of adhesives intended to materials in contact with foodstuffs. It provides concrete explanations of compliance information that there is a need to collect for raw materials in order to assess the adequacy of the adhesive system. This guide also provides a declaration model of composition for communicate relevant information to provide users downstream. It is therefore to help the downstream user to know how to demonstrate compliance of its products according to the requirements of Regulation EC N° 1935/2004.

The guide is available on the website : [Conseils pour une déclaration de composition des adhésifs pour contact alimentaire](#)
